Dear Sir,

Amendment A

All claims standing for examination are reproduced below as an aid in prosecution. Those amended herein are marked (Amended). Those not amended are marked (Unchanged).

1. A system for configuring Internet appliances, comprising:
- a server having a connection to a network;
 - a data repository accessible by the server, and comprising data related to Internet appliances to be configured, the data associated with specific appliances by a telephone number or address used to access the system; and
 - control routines for configuring Internet appliances via the network
